

EZ-ELD™
Keep it simple

KEEP IT SIMPLE WITH EZ-ELD™

ELECTRONIC LOGGING DEVICE

With the FMCSA's upcoming ELD legislation affecting an estimated three million drivers on the road today, and the December 2017 deadline approaching, it's time for fleet operators to get ready for the new rules and regulations.

An easy solution

We know you're looking for an easy and cost-effective solution that keeps you compliant when this legislation comes into force.

So that's exactly what we've developed. The EZ-ELD will help you stay the right side of the new rules, offering a cost-effective solution to help track and manage your drivers' Hours of Service.

Once fitted with an EZ-ELD, your trucks will be fully compliant with the FMCSA's ELD regulations, without the need for added extras or further investment.

A quick fit

The EZ-ELD's installation is an easy "plug and play" process. The unit is simply fitted to the trucks diagnostics port, the driver securely connects to the device with the mobile app and that's it, they're ready to hit the road.

Unlike competitor products, you don't need to worry about the type of OBD port you have. You'll get three interchangeable connectors with the device, making it easy to switch between vehicles and removing the need to buy another unit if you change or upgrade your truck.

In the driver's seat

With the EZ-ELD, everything is about simplicity. Drivers will find the smartphone or tablet interface easy to navigate and effortless, leaving them to focus on doing what they do best. And when your drivers are out on remote, long-haul drives where connectivity can be an issue, the EZ-ELD has you covered. It's able to store up to 6 months of data on the device.

For drivers working across multiple vehicles in the fleet, EZ-ELD comes with "Scan and Drive" technology. Drivers simply scan the QR code linked to the unit, their smartphone will automatically link with the vehicle and they are ready to go.

Back in the office

It's in the office where our software comes into it's own. You can easily manage different drivers and devices in the same fleet simultaneously. To help keep your business moving, we've made additional storage available on the EZ-ELD software. We've also added an instant messaging feature to help you stay in touch with drivers out on the road.

- FMCSA certified
- The only ELD solution that comes with 6-pin, 9-pin and OBDII interchangeable connectors included
- Real time tracking & vehicle location
- Unique Scan and Drive™ truck pairing
- Quick 'plug and play' installation
- Tamper resistant for enhanced security
- Super-simple user interface for drivers via mobile app
- HOS & DVIR reporting
- 6 months of data storage on device
- Legal and product support
- An easy and cost-effective way to manage your fleet
